DOMAINE DE BOIS CHERI

from tradition...

Domaine de Bois Chéri is one of the pioneering and largest tea producers in Mauritius, with a rich heritage dating back to 1892. Located in the south of the island, it boasts some of the oldest tea plantations in Mauritius.

We offer a diverse array of black tea flavours, including natural, coconut, exotic fruits, Earl Grey, lemon, and vanilla. Our herbal tea selection features ayapana, moringa, lemongrass, and ginger. Additionally, we provide a range of green teas, both natural and flavoured with jasmine and mint.

Situated at nearly 500 meters above sea level, the Domaine de Bois Chéri benefits from ideal conditions for cultivating exceptional tea. Le Chalet du Domaine de Bois Chéri, renowned for its breathtaking views, offers tea tastings, a restaurant, and a shop.

to innovation...

THE PROCESS

1

HARVESTING

Only the three youngest leaves are picked. Each picker can collect 50 to 60 kg of leaves daily during the summer.

2

RECEIVING

Harvested leaves are transported in 10 kg bags to the factory and moved to the withering rooms.

3

WITHERING

The leaves are left to wilt for 24 hours, losing about 50% of their weight.

4

CRUSHING

The withered leaves are finely chopped using rotating blades.

5

FERMENTATION

Chopped leaves are exposed to air, allowing enzymes to ferment the leaves for about 1.5 hours, developing the tea's colour, aroma, and taste.

6

DRYING

The tea is dried in ovens at 110°C for 10 minutes, reducing moisture to 2.5–3%.

THE PROCESS

7

EXTRACTION OF FIBRES

The tea is processed through plastified rollers charged with static electricity to remove most of the fibres.

8

SLEVING

The tea is sifted to separate it into different grades based on size and quality.

9

CURING PROCESS

The tea is stored in silos for at least three months.

10

FLAVOURING & PACKING

Flavouring is blended after three months. The tea is then packed into various sizes and tea bags (2 grams each).
